*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Chief, Geographic Research

DATE: 3 September 1959

FROM : Acting Chief, Geography Division

SUBJECT: Geography Portion of Revised Intelligence Subject Code

1. As it stands, the geography portion of the new ISC could hardly be poorer. It is inaccurate, illogical, and incomplete. We have recast the whole business, and submit Enclosure 1 as a proposed replacement. Enclosure 2 is a copy of the original.

2. You may remember that a special committee was set up in early 1958 to advise OCR on the ISC revision project. I became aware of it quite accidentally sometime after I returned from Europe when someone mentioned that [REDACTED] was the ORR representative on such a committee. I checked with [REDACTED] (I don't remember which) at that time, and was told that [REDACTED] was selected to be on the committee because of the special advice required in handling economics. It would now appear that this USIB-wide group required other assistance as well.
